Demonstration in Quimper- France

Demonstration of milk producers in Quimper. Picture from Le Telegramme by Christian Rose

Quimper- France

200 milk producers have blocked the Chamber of Agriculture in Brittany on April 2nd 2010. This demonstration was conducted by APLI, Confederation paysanne and Coordination rurale because they were not invited to the general assembly of the Chamber. This assembly was important for farmers because it had to adopt the creation of associations of producer organisations.

Moreover milk producers would rather implement a European producers organisation than create this kind of local producer organisation.
