Milk powder - curse or blessing for the EU dairy sector?

Invitation to the press: visit of a milk powder warehouse in Liège/Belgium (24.01.2018)

Dear Representatives of the Media,

Seldom have they all been so united. The overflowing stocks of skimmed milk powder in the intervention are jeopardising a positive development of the milk price.

So is the intervention in its present form still fit for purpose? For you to obtain an accurate picture of the situation, we are inviting you, along with European policy-makers and the Executive Committee of the European Milk Board, to visit a large Belgian warehouse for intervention powder.

The visit to the Vincent Logistics warehouse in Herstal is on Wednesday, 24 January 2018 from 11:00 to 12:00 a.m.

Place:

Vincent Logistics

Parc industriel des Hauts-Sarts

Première avenue, 32

B-4040 Herstal

After the visit there will be an opportunity to exchange ideas on the current situation during a lunchtime snack. A shuttle bus to Herstal is being organised from/to the European Parliament (departure around 09:30).

We will be pleased to see you at this unique event, and request that you register by 16 January at [office\[at\]europeanmilkboard.org](mailto:office[at]europeanmilkboard.org).

Kind regards,

Romuald Schaber, EMB president
