What does the future hold for European dairy farmers in the aftermath of COVID-19? We certainly knew that we would be dealing with a European dairy market that is completely different from that of reference year 2019. This crisis has shown yet again that implementing the EMB's [special-content market-responsibility-programme.html_blank](#) external-link-new-window external link in new>Market Responsibility Programme is the only way to ensure cost-covering milk prices for producers.
