Press Invitation to Major Demonstration on Monday, October 19

EU Agriculture Council in Luxembourg: Several thousand dairy farmers from all over Europe expected

The weeks and months of protests by European dairy farmers have finally put the political machinery in motion. "Dairy farmers welcome the statement by the majority of the agriculture ministers that they wish to retain an innovative production management system also after 2015, thus putting an end to the milk crisis," says Romuald Schaber, President of the European Milk Board (EMB), commenting on the meeting of the ministers that took place in Vienna on October 12.

Referring to the meeting of the EU Council of Agriculture Ministers, to be held in Luxembourg on Monday October 19, Schaber has this to say: "Within this logic, it now makes sense to effectively remove the milk surpluses from the market in the short term." The European Milk Board (EMB) is demanding that EU agriculture ministers immediately restrict netting across Europe and implement a voluntary suspension of partial quotas without delay. This means that as a result, it will be possible to limit milk production, allowing dairies once more to pay significantly better prices for milk. The long-term aim is to set up a monitoring mechanism, in which milk producers, consumers, dairies and politicians take joint responsibility and analyse the market, with the aim of bringing milk production in line with demand. One of the targets is to achieve a price that will cover the costs incurred by the producers.

"There will be several thousand dairy farmers and several hundred tractors making their way to Luxembourg next Monday, to lend emphasis to their demands," says Fredy de Martines of the LDB, the Luxembourg branch organisation of the EMB. In addition to a rally, a number of powerful demonstrations are also planned, and media partners are invited to attend.
