The French Senate voted compulsory contractualisation

On May 26th. the French Senate voted compulsory contractualisation for the Law of agricultural Modernisation.

This implies that the Senate reinforces the French interprofession, that is to say the major producers union in France (FNSEA) and reinforces also the relationship between this union and milk industries and milk cooperatives.

The Coordination rurale, minority producers union whose OPL belongs to, will intervene in the French legislative Assembly (2nd Chamber) to prevent this bill from being adopted.
